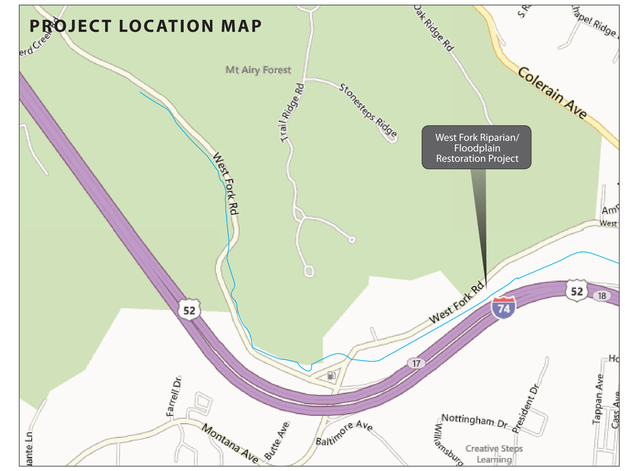
WEST FORK CREEK RIPARIAN/FLOODPLAIN RESTORATION PROJECT



Panicum virgatum 'Northwind' - Northwind Switchgrass

Eupatorium maculatum 'Gateway' - Gateway Joe Pye Weed

Liriodendron tulipifera - Tulip Poplar

Itea virginica - Virginia Sweet Spire

Solidago rugosa 'Fireworks'- Fireworks Goldenrod

Project Description: MSD is partnering with Groundwork Cincinnati/Mill Creek to design and construct a stormwater bioinfiltration basin along the West Fork Channel in the vicinity of 1759 West Fork Road. The project is partially funded by a Clean Ohio Conservation Fund grant. Stormwater will be captured from West Fork Road through inlet drains in the street and via overland flow. Excess stormwater in the basin will drain to the West Fork Channel. The project reduces CSOs into the West Fork Channel from CSO 128. Anticipated construction: 2014.
