

KINGS RUN PROJECT, PHASE B

Construction: 2017 - 2018

Phase B includes:

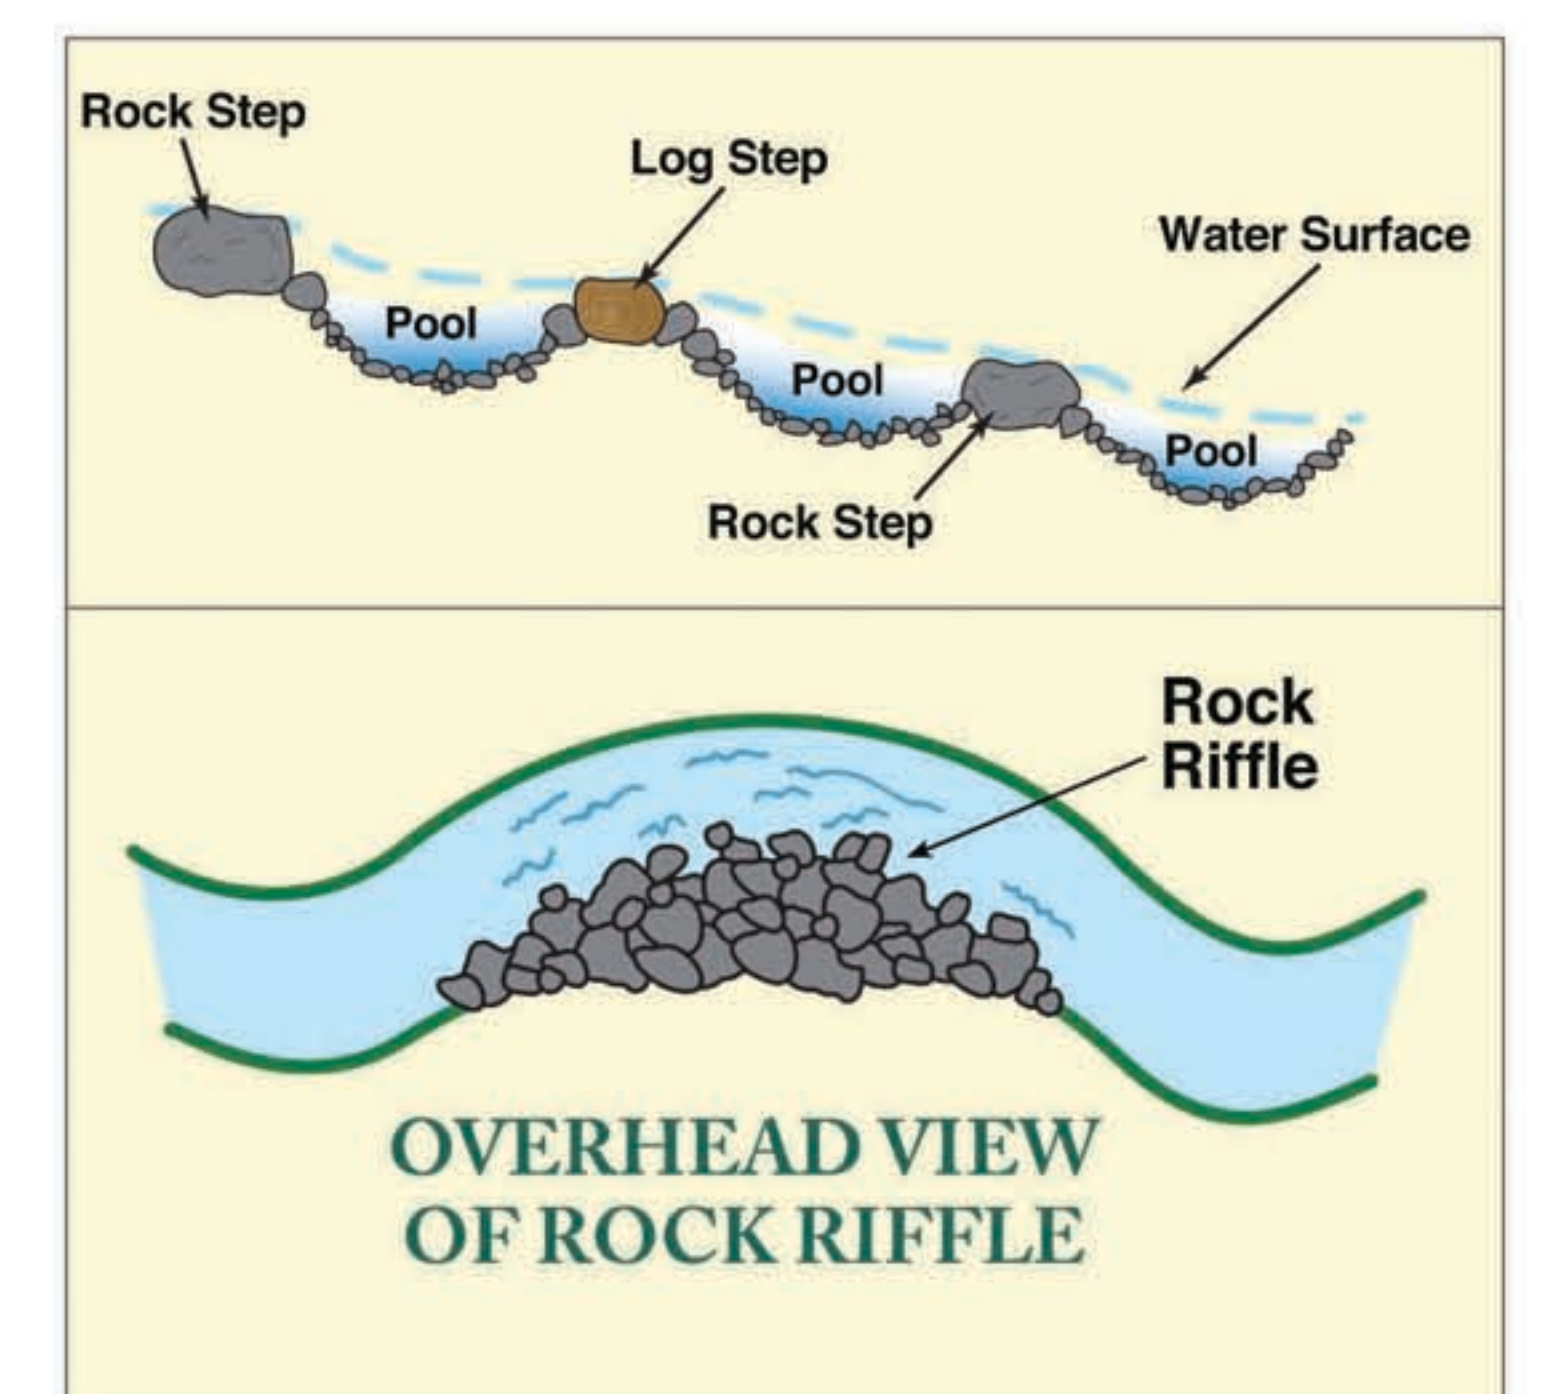

- ~1.5 million gallon storage tank to capture and store overflows from upstream of CSO 217
- Improvements to Kings Run stream to help slow flow/reduce erosion
 - Wetland near CSO 217
 - Riffles, rock steps and log vanes in select locations
 - Stabilization of bottom and sides of stream bank in select locations
 - Trees and other plantings along banks

Storage tank example (not to scale)

Erosion of Kings Run stream

Examples of stream stabilization: step pools and rock riffles
